Explanation

Adjusted EBITA	<p>Adjusted EBITA represents a recurring operating result and excludes significant special items. RTL Group management has established an 'Adjusted EBITA' that neutralises the impacts of structural distortions for the sake of transparency. Based on the accelerated industry trends explained in the Market section (pages 46 to 47) and Strategy section (pages 14 to 18) in RTL Group's Full-year results 2023 report, RTL Group plans to increase its investments in business transformation including streaming, premium content, technology and data. At the same time, management continually assesses opportunities to reduce costs in the Group's traditional broadcasting activities – for example, reallocating resources from its traditional businesses to its growing digital businesses – and this may lead to restructuring expenses that are neutralised in the Adjusted EBITA.</p>
	<p>Adjusted EBITA is determined as earnings before interest and taxes (EBIT) as disclosed in the income statement excluding the following elements:</p> <ul style="list-style-type: none">– Impairment of goodwill of subsidiaries and amortisation and impairment of fair value adjustments on acquisitions of subsidiaries– Impairment and reversals of investments accounted for using the equity method– Impairment and reversals on other financial assets at amortised cost presented in 'Other operating expenses' or 'Other operating income'– Re-measurement of earn-out arrangements presented in 'Other operating income' or 'Other operating expenses'– Fair value measurement of investments presented in 'Other operating income' or 'Other operating expenses'– (Gain)/loss from sale of subsidiaries, other investments and re-measurement to fair value of pre-existing interest in acquiree– Significant special items
Adjusted EBITA margin	<p>The Adjusted EBITA margin as a percentage of Adjusted EBITA of revenue is used as an additional criterion for assessing business performance.</p>

Explanation

Adjusted EBITA before streaming start-up losses

In accordance with RTL Group's strategy, the company continued to invest heavily in its streaming services, RTL+ in Germany and Hungary and M6+ in France, all of which have seen a rapid increase in the number of paying subscribers (for further details please refer to **Building national streaming champions** on page 50 of RTL Group's Annual Report 2023). The Adjusted EBITA of RTL Group is impacted by effects relating to the growth of its streaming services. These are operational in nature, and are not included in 'Significant special items'. RTL Group believes the disclosure of 'streaming start-up losses' and 'Adjusted EBITA before streaming start-up losses' provides important context for its business performance, hence it discloses information relating to both KPIs in addition to its leading alternative performance measure, 'Adjusted EBITA'. Streaming start-up losses are defined as a total of Adjusted EBITA from RTL+ in Germany and Hungary, M6+ in France, Salto and Bedrock as consolidated at RTL Group level.

Significant special items

Significant special items exceeding the cumulative threshold of €5 million, need to be approved by management, and primarily consist of restructuring expenses or reversal of restructuring provisions and other special factors or distortions. The adjustments for special items serve to determine a sustainable operating result that could be repeated under normal economic circumstances and is not affected by special factors or structural distortions.

Streaming start-up losses

Streaming start-up losses are defined as a total of Adjusted EBITA from RTL+ in Germany and Hungary, M6+ in France, Salto and Bedrock as consolidated on RTL Group level.

Explanation

Operating cash conversion rate

Operating cash conversion rate means operating free cash flow divided by EBITA.

Net cash/(debt)

The net cash/(debt) is the gross balance sheet financial debt adjusted for 'Cash and cash equivalents'; current deposits with shareholder and its subsidiaries reported in 'Accounts receivable and other current assets'.

Organic growth/decline

The organic growth is calculated by adjusting the reported revenue growth mainly for the impact of exchange rate effects, corporate acquisitions and disposals. It should be seen as a component of the reported revenue shown in the income statement. Its main objective is for the reader to isolate the impacts of portfolio changes and exchange rates on the reported revenue. When determining the exchange rate effects, the functional currency that is valid in the respective country is used. Potential other effects may include changes in methods and reporting.
