

On our way to climate neutrality by 2030

Our climate target

RTL Group supports the international goal of limiting global warming to 1.5°C compared to pre-industrial levels. We decided to become **carbon neutral by 2030**, including both company-related emissions (scope 1 and 2) and emissions from the production of its programmes and products (scope 3). The goal is to **reduce the RTL Group's total emissions by more than 50 per cent** compared to the 2018 baseline. As of 2030, RTL Group will offset all remaining emissions.

Development of RTL Group's carbon footprint (*) (in t CO₂e) 2018 – 2023

(*) Divestments excluded: SpotX, RTL Belgium, RTL Croatia and RTL Nederland | Baseline includes acquisitions (e.g., G+J) but excludes emissions from productions from Fremantle acquisitions (ca. 12% of production volume in hours)

Current non-financial reporting

Non-financial statement: The information of the combined non-financial statement (which complies with the current European Directive 2014/95/EU and provisions by the law of 23 July 2016 regarding the publication of non-financial and diversity information in Luxembourg) can be found in the Annual Report 2023 of RTL Group's majority shareholder, Bertelsmann SE & Co KGaA.

Global Reporting Initiative (GRI): Further information on RTL Group's non-financial information can also be found in the GRI reporting of Bertelsmann SE & Co KGaA.

Future CSRD reporting

Until 2023, RTL Group reported on its carbon footprint according to GRI. As **RTL Group is currently shifting to CSRD reporting**, an RTL Group-specific GRI table for 2023 has been omitted. RTL Group will publish its CSRD reporting (including detailed quantitative and qualitative information on emissions) as part of its Annual Report 2024.
