Alternative performance measure **Explanation** Adjusted EBITA represents a recurring operating result and excludes significant special items. RTL Group management has established an 'Adjusted EBITA' that neutralises the impacts of structural distortions for the sake of transparency. Based on the accelerated industry trends explained in the Market section (pages 15 to 16) and Strategy section (pages 17 to 21) in RTL Group's Directors' report, RTL Group plans to increase its investments in business transformation including streaming, premium content, technology and data. At the same time, management continually assess opportunities to reduce costs in the Group's traditional broadcasting activities – for example, reallocating resources from its traditional businesses to its growing digital businesses – and this may lead to restructuring expenses that are neutralised in the Adjusted EBITA. Adjusted EBITA is determined as earnings before interest and taxes (EBIT) as disclosed in the income statement excluding the following elements: Adjusted EBITA Impairment of goodwill of subsidiaries and amortisation and impairment of fair value adjustments on acquisitions of subsidiaries - Impairment and reversals of investments accounted for using the equity method Impairment and reversals on other financial assets at amortized amortised cost presented in 'Other operating expenses' or 'Other operating income' Re-measurement of earn-out arrangements presented in 'Other operating income' or 'Other operating expenses' Fair value measurement of investments presented in 'Other operating income' or 'Other operating expenses' (Gain)/loss from sale of subsidiaries, other investments and re-measurement to fair value of pre-existing interest in acquiree Significant special items The Adjusted EBITA margin as a percentage of Adjusted EBITA of revenue is used as an additional criteria for assessing business Adjusted EBITA margin performance.

Definitions

Alternative performance measure	Explanation							
Adjusted EBITA before streaming start-up losses	In accordance with RTL Group's strategy, the company continued to invest heavily in its streaming services, RTL+ in Germany and Hungary and Videoland in the Netherlands, all of which have seen a rapid increase in the number of paying subscribers (for further details please refer to Building national streaming champions on page 19). The Adjusted EBITA of RTL Group is impacted by effects relating to the growth of its streaming services. These are operational in nature, and are not included in 'Significant special items'. RTL Group believes the disclosure of 'streaming start-up losses' and 'Adjusted EBITA before streaming start-up losses' provide important context for its business performance, hence it discloses information relating to both KPIs in addition to its leading alternative performance measure, 'Adjusted EBITA'. Streaming start-up losses are defined as a total of Adjusted EBITA from RTL+ in Germany and Hungary, Videoland/RTL XL, Salto and Bedrock as consolidated on RTL Group level.							
Significant special items	Significant special items exceeding the cumulative threshold of €5 million, need to be approved by management, and primarily consist of restructuring expenses or reversal of restructuring provisions and other special factors or distortions. The adjustments for special items serve to determine a sustainable operating result that could be repeated under normal economic circumstances and is not affected by special factors or structural distortions.							
Streaming start-up losses	In accordance with RTL Group's strategy significant efforts were spent in growth businesses of streaming activities. Furthermore, the company is continuing to heavily invest in its streaming services RTL+ (Germany and Hungary) and Videoland with a rapidly increasing number of paying subscribers.
